

## Recent trends

Improving

Deteriorating

Stable

Unclear

## Grades

**Very good:** Very few, if any, populations of species have declined as a result of human activities or declining environmental conditions

**Good:** Populations of some species (but no species groups) have declined significantly as a result of human activities or declining environmental conditions

**Poor:** Populations of some species or species groups have declined significantly as a result of human activities or declining environmental conditions

**Very poor:** Populations of a large number of species or species groups have declined significantly as a result of human activities or declining environmental conditions

## Confidence

**Adequate:** Adequate high-quality evidence **and** high level of consensus

**Somewhat adequate:** Adequate high-quality evidence **or** high level of consensus

**Limited:** Limited evidence **or** limited consensus

**Very limited:** Limited evidence **and** limited consensus

**Low:** Evidence and consensus too low to make an assessment

## Comparability

**Comparable:** Grade and trend are comparable to the previous assessment

**Somewhat comparable:** Grade and trend are somewhat comparable to the previous assessment

**Not comparable:** Grade and trend are not comparable to the previous assessment

**Not previously assessed**
